## SUPREM light

## SUPREM FORMEN

### Small-shaped pads

The SUPREMLight is a range of products for managing **light to moderate incontinence**. They are designed for the small urinary losses caused by bladder weaknesses. This range of products provides anti-leakage security, discretion and comfort and can be worn with GANMILL *Fix* mesh pants, GANMILL *Panty* or GANMILL *Boxers* or regular underwear.

SUPREM **FORMEN** has been specifically developed to meet the need of male users.

SUPREMLight Mini, Normal, Extra, Extra + and SUPREM **FORMEN** Extra are packed individually for more discretion.

## Product advantages

### Breathable

Waterproof back sheet that enables the air to flow to maximise skin integrity.

### More discrete

Anatomic shape for a better fit and more comfort, whilst remaining discrete.

### No leakage

A peel off strip helps to keep the pad in place, greatly reducing the risk of leakage.

### More absorbency

The Super absorbent Polymer provides a faster absorption and helps to keep the user dryer, longer.

### Odour control

New generation Super absorbent Polymer : maximizes the absorbency level and neutralises odours.

### Wetback

The acquisition layer improves the rate of absorption, greatly reducing the risk of leakage and any potential feeling of wetness.

### Hypoallergenic

The SUPREM range has been tested under dermatological conditions with the results proving the pads to be hypoallergenic.

## Easy identification

Colour code / Absorption level

### Survival of the Candida Albicans on human skin under incontinence management (Source: EDANA)

This study shows that the number of infections by Candida Albicans has been reduced by 50% among the users wearing breathable backed products in comparison with the users wearing polyethylene backed products.
